

Python on Android

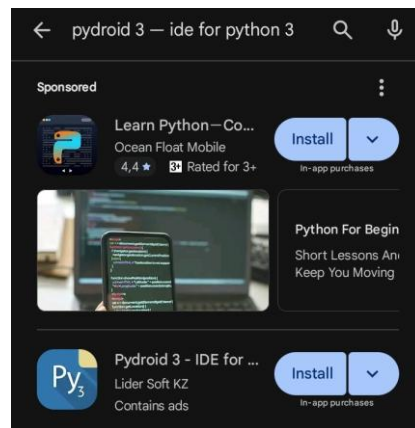

Installation Guide

Step-by-step setup using Pydroid 3

STEP 01

Open Google Play Store

Open the Google Play Store on your Android device and search for Pydroid 3 - IDE for Python 3. Tap Install and wait for the download to complete.

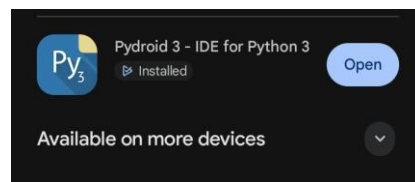

Search results for Pydroid 3 in the Play Store

STEP 02

Launch Pydroid 3

Once installed, tap the Open button to launch the application for the first time.

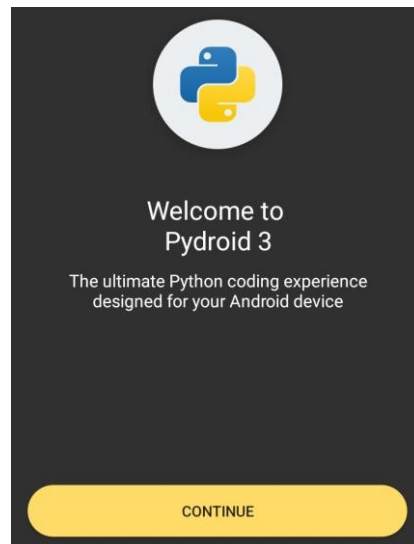

Tap 'Open' to start Pydroid 3

STEP 03

Welcome Screen

The welcome screen will appear. Tap Continue to proceed with the setup.

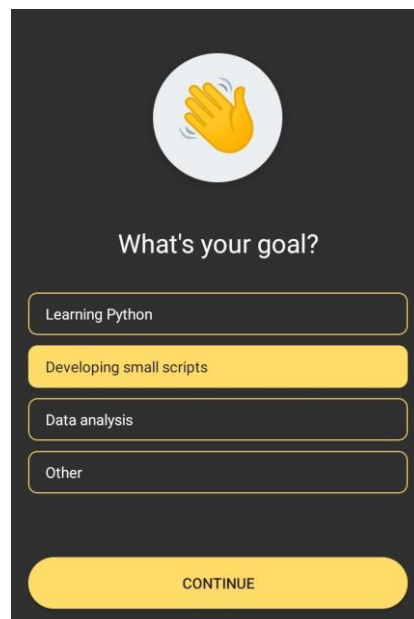

Tap Continue on the welcome screen

STEP 04

Select Your Goal

Choose Develop Small Scripts as your goal, then tap Continue.

Image is replaceable: right-click the screenshot and choose Change Picture.

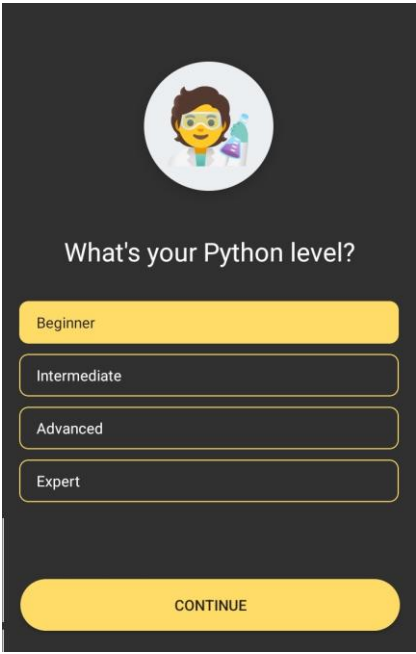

Select 'Develop Small Scripts'

STEP 05

Choose Your Level

Select Beginner as your experience level and tap Continue.

What's your Python level?

Beginner

Intermediate

Advanced

Expert

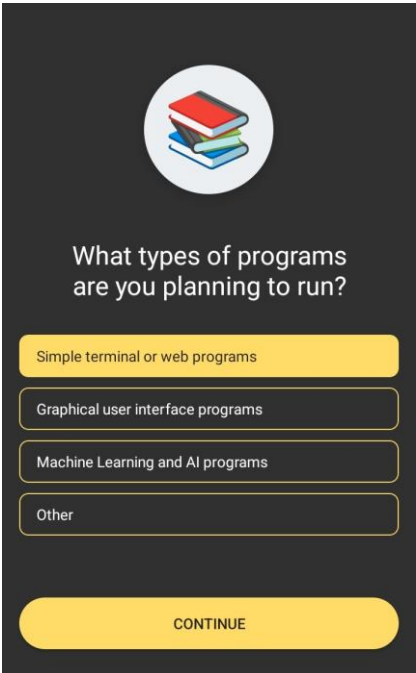

CONTINUE

Select 'Beginner' level

STEP 06

Select Program Type

Choose Simple Terminal or Web Programs as your preferred program type.

What types of programs are you planning to run?

Simple terminal or web programs

Graphical user interface programs

Machine Learning and AI programs

Other

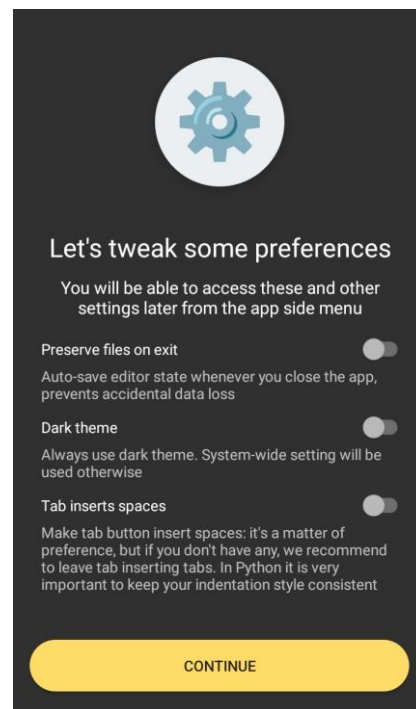

CONTINUE

Select 'Simple Terminal or Web Programs'

STEP 07

Continue Setup

Tap Continue to move to the next setup screen.

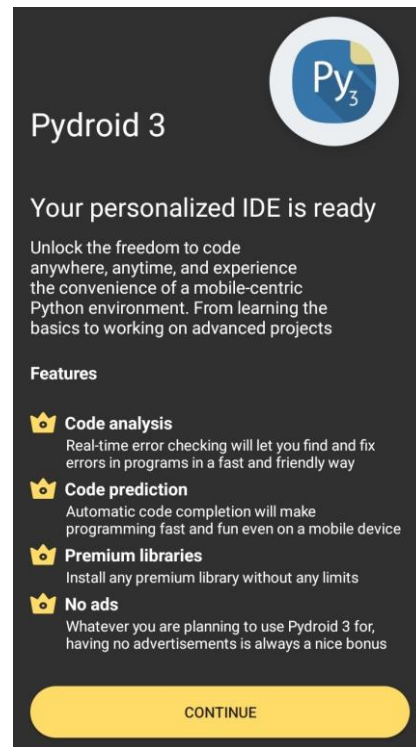

Tap Continue

STEP 08

Continue Again

Tap Continue once more to proceed to the next step.

Image is replaceable: right-click the screenshot and choose Change Picture.

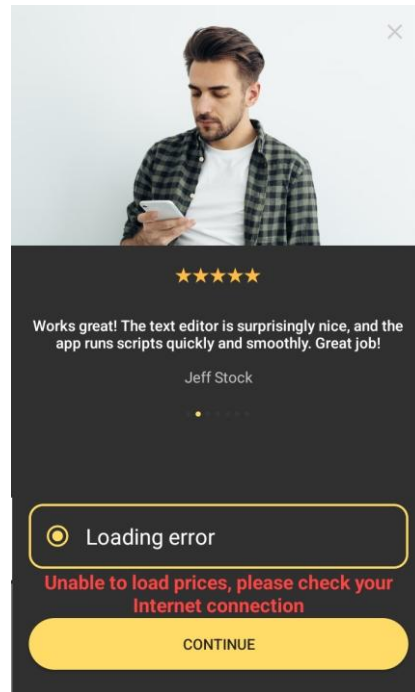

Tap Continue again

STEP 09

Close Info Window

An information window will appear. Close it by tapping the Close (X) button in the top-right corner.

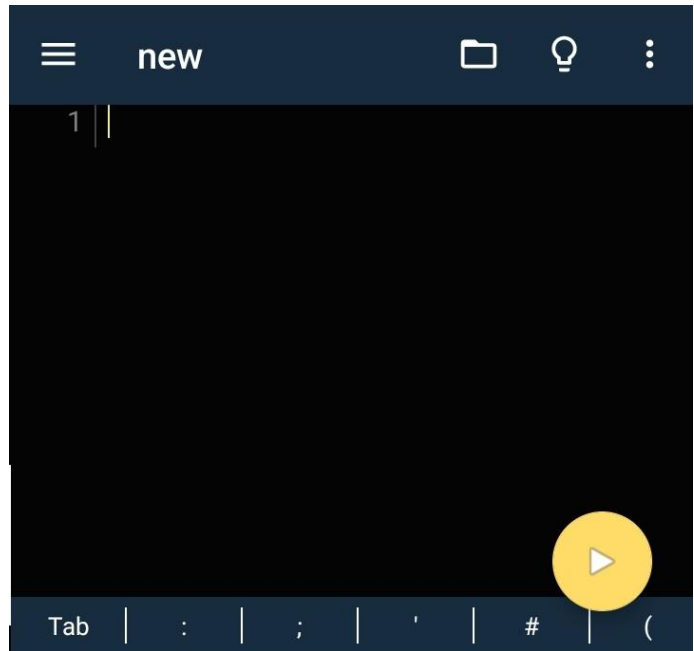

Close the information window

STEP 11

The Coding Screen

Once installation is complete, the coding editor screen will appear. This is where you write your Python programs.

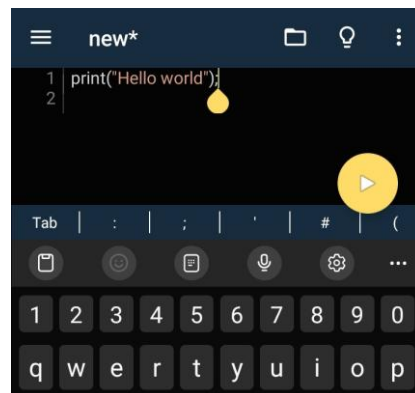

The Pydroid 3 coding editor

STEP 12

Run Your First Program

Type `print("Hello World")` exactly as shown. Then press the yellow Run/Play button at the bottom of the screen.

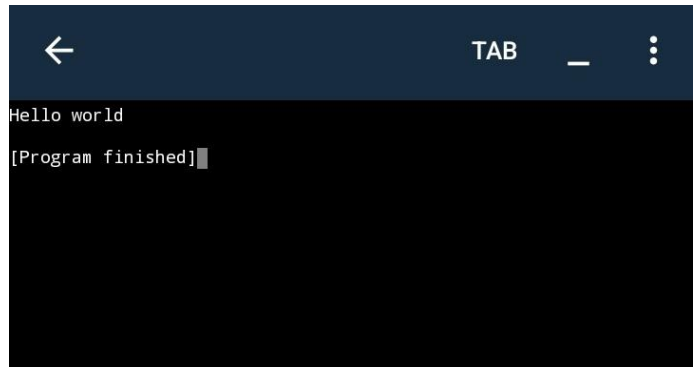

Type the code and press Run

STEP 12

Program output

The text **"Hello World"** will be displayed on the screen, indicating that the program ran successfully.

A screenshot of a terminal window on an Android device. The window has a dark blue header bar with a back arrow on the left, the word 'TAB' in the center, and a minus sign and three dots on the right. The main area is black with white text. The first line says 'Hello world' and the second line says '[Program finished]' followed by a cursor.

Program output

Congratulations!

You have successfully installed Python on your Android device and run your first Python program.

What's Next?

- Introduction to Python basics
- Understanding the `print()` function
- Working with variables
- Writing simple programs
